Emerging Information Systems Developer with experience in full-stack application development, database systems, and machine learning concepts. Trained in systems design, data communications, and IT security through BYU's junior core while building solutions in Python, SQL, AWS, and automation tools. Recognized for analytical thinking, clean system architecture, and translating business needs into scalable technical outcomes.

EDUCATION

Brigham Young University – Marriott School of Business <i>Working toward Bachelor of Science in Information Systems, Minor in Computer Science</i> - GPA 3.93 / 4.00 - Dean's List: Fall 2024, Winter 2025	Provo, UT Apr 2027
--	-----------------------

TECHNICAL SKILLS

-
- AI & Machine Learning: Supervised learning, predictive modeling, feature engineering, Scikit-learn
 - Data & BI: SQL, Tableau, Excel, VBA, Power BI
 - Development: HTML/CSS, Python, JavaScript
 - Cloud & Infrastructure: AWS (EC2, S3), Linux, Git
 - Security: IAM, RBAC implementation, vulnerability scanning
 - Agile & Project Management: Scrum (PSM I)
 - Languages: Spanish (proficient, spoken/written)

EXPERIENCE

Dulles South Neighborhood Closet Full-Stack Developer (<i>Volunteer</i>) - Partnered with nonprofit leadership to modernize their web presence, implementing a custom-built web application to streamline fundraising and community outreach - Architected a zero-cost, lightweight relational database utilizing Google Sheets and Google Apps Script, engineering custom API endpoints to handle secure data retrieval and entry - Automated internal backend workflows and reporting pipelines, reducing manual administrative data entry	Dulles, VA April 2026 – Present
BYU Continuing Education Registration Center <i>Customer Service Representative</i> - Resolved 350+ daily inquiries using ticketing software and technical troubleshooting tools, boosting customer satisfaction scores and reducing wait times - Automated reporting workflows using Excel formulas, pivot tables, and VBA, reducing manual processing time and improving data accuracy	Provo, UT Sept 2021-April 2022, Sept 2024 - Present
Amazon <i>Delivery Driver</i> - Delivered 120+ packages daily across assigned region with 99% satisfaction and zero delivery errors - Trained and coached new drivers on routing apps and best practices, accelerating team performance	Gainesville, VA May 2024 - August 2024
Church of Jesus Christ of Latter-Day Saints, Ecuador Guayaquil West Mission <i>Full-Time Missionary</i> - Led districts and zones of 6–32 missionaries, designing weekly training systems and using digital planning tools to track progress and improve teaching outcomes - Trained 20+ missionaries in Spanish language, teaching skills, and outreach, increasing engagement success	Guayaquil, Ecuador May 2022 - May 2024

AWARDS AND FEATURED PROJECTS

-
- Built a full-stack web app for a nonprofit using **AWS (EC2, RDS), Python, JavaScript, SQL, and HTML/CSS**, delivering a deployed platform with analytics dashboards | Dec 2025
 - 1st Place, TES Innovation Contest** | BYU College of Engineering
 - 1st Place, Systems Development Challenge – LyrningLMS** | React, Node.js, Postgres, Groq | Mar 2026
 - Prioritized **AI Governance** by engineering a custom **AI Dependency Score** to provide transparent oversight of student-agent interactions and ensure academic integrity
 - Built and deployed a full-stack nonprofit management system (React, TypeScript, ASP.NET Core, Azure Postgres) with role-based security and ML-driven insights to track resident care and optimize donor impact | Apr 2026
